GENIE® INTRODUCES GPower™ 900 RESIDENTIAL GARAGE DOOR OPENER

Reliable, maintenance free and value

MT. HOPE, OH – The Genie Company, the most recognized brand in garage door openers, announced the introduction of a new Genie® Professional Line product, the GPower™ 900 garage door opener. This new opener offers reliability and power by leveraging Genie’s strength as the original screw drive manufacturer with the addition of new, innovative features.

The GPower™ 900 opener provides strength and reliability, and features a ½ HP AC motor combined with Genie’s patented, direct drive screw system. The powerful AC motor and direct drive screw system provide the power to operate residential doors up to 500 pounds in weight while still offering smooth operation.

“Homeowners will be amazed with the GPower™ 900”, said Mike Kridel, President of The Genie Company. “The innovative design of its direct drive system provides maintenance-free performance for the life of the opener.”

When it comes to convenience and safety, the opener offers notable features. The direct drive screw system is powerful and reliable, and is designed to be maintenance free – a feature all homeowners can appreciate. The GPower™ 900 features a rear directional two-bulb light system that provides up to 120 watts of light where it is needed most, increasing safety and convenience in the garage. The remotes feature Intellicode®2, a new generation superior encryption system, as well as an auto seek technology that uses both 315 and 390 MHz frequencies to reduce interference.
