BELT/CHAIN DRIVE GARAGE DOOR OPENER MODELS:
3020H & 3020H-B

PROGRAMMING, OPERATION & MAINTENANCE MANUAL

Includes INTELLICODE® Remote Control.
The Included Safe-T-Beam® system MUST be installed to close the door. DO NOT use other brands or types.
For use with residential sectional overhead garage doors ONLY.
Homelink® and Car2U® compatible

Need help or have questions?
For answers and assistance,
visit www.GenieCompany.com
or call Customer Service at: 1-800-35-GENIE

WARNING
To reduce the risk of injury to persons or damage to property, use this opener only with a sectional residential door.

AVERTISSEMENT
Por reduire le risque de blessures ou de dommages materials, utilisez cet ouvre-porte uniquement pour une porte a section re sidentielie.

FCC Part 15.21 Statement:
Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

FCC / IC Statement:
This device complies with FCC Part 15 and Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d’Industrie Canada applicables aux appareils radio exempts de licence. L’exploitation est autorisée aux deux conditions suivantes : (1) l’appareil ne doit pas produire de brouillage, et (2) l’utilisateur de l’appareil doit accepter tout brouillage radiélectrique subi, même si le brouillage est susceptible d’en compromettre le fonctionnement.

TRANSMITTER COMPLIANCE STATEMENT
Transmitters comply with all United States and Canadian legal requirements as of the date of manufacture. No warranty is made that they comply with all local laws and regulations which may differ from United States and Canadian requirements prior to use.

Les transmetteurs émettent toutes les autorisations légales de l’Etats-Unis et du Canada, en date de fabrication. Aucune garantie n’est apportées incluant le fait qu’ils sont conformes à toutes les prescriptions juridiques d’autres autorités. Si les transmetteurs sont utilisés dans d’autres pays, il incombe à l’utilisateur de déterminer leur conformité aux lois et règles locales pouvant différer de celles des États-Unis et du Canada avant toute utilisation desdits transmetteurs.

Sendegeräte entsprechen allen gesetzlichen Bestimmungen in den USA und Kanada zum Zeitpunkt der Herstellung. Wir übernehmen keine Gewährleistung für die Einhaltung aller gesetzlichen Bestimmungen in anderen Ländern. Sollen Sendegeräte in anderen Ländern eingesetzt werden, so muss der Importeur vor dem Gebrauch sicherstellen, dass die Sendegeräte auch solchen lokalen Bestimmungen entsprechen, welche von den Bestimmungen der USA und Kanadas abweichen.

SAVE THESE INSTRUCTIONS
READ AND FOLLOW ALL INSTRUCTIONS
Thank you for purchasing a Genie® brand garage door opener. The leader in garage door opener technology.

Please take a moment to preview this manual and assembly poster to ensure that you have the proper tools and skill set to install a new garage door opener. Pay particular attention to all Safety Warnings, Cautions and Information. Remember, your garage door is the largest and heaviest moving object in your home.

Before setting up your new garage door opener, please locate and record the model plate on the opener. This information will be necessary should you seek technical support via our website, customer support department or local servicing Genie dealer.

Model Number:______________________________

Serial Number:______________________________
OVERVIEW OF POTENTIAL HAZARDS
READ THIS SAFETY INFORMATION

Garage doors are large, heavy objects that move with the help of springs under high tension and electric motors. Since moving objects, springs under tension, and electric motors can cause injuries, your safety and the safety of others depend on you reading the information in this manual. If you have questions or do not understand the information presented, call your nearest trained door system technician or visit our website at www.geniecompany.com.

CONVENTIONS USED IN THESE INSTRUCTIONS
The following safety alert symbol and signal words are used throughout this manual to call attention to and identify different levels of hazards and special instructions.

This is the safety alert symbol. This symbol alerts you to potential hazards that can kill or hurt you and others. All safety messages will follow the safety alert symbol and the word “DANGER,” “WARNING,” or “CAUTION”.

- **DANGER** indicates an imminently hazardous situation which, if NOT avoided, will result in death or serious injury.
- **WARNING** indicates a potentially hazardous situation which, if NOT avoided, could result in death or serious injury.
- **CAUTION** indicates a potentially hazardous situation which, if NOT avoided, may result in injury or property damage.
- The word **NOTE** is used to indicate important steps to be followed or important considerations.

Tous les messages concernant la sécurité seront indiqués après un symbole d’alerte de la sécurité et l’une des mentions suivantes “DANGER”, “AVERTISSEMENT” ou “MISE EN GARDE”.

- **DANGER** signale une situation dangereuse imminente qui, si elle n’est pas évitée, risque d’entraîner des blessures graves, voire mortelles.
- **AVERTISSEMENT** signale une situation potentiellement dangereuse qui, si elle n’est pas évitée, risque d’entraîner la mort ou des blessures graves.
- **MISE EN GARDE** signale une situation potentiellement dangereuse qui, si elle n’est pas évitée, risque d’entraîner des blessures ou des dommages matériels.
- Le terme **REMARQUE** est utilisé pour signaler les étapes importantes à suivre ou d’importants éléments à prendre en considération.

IMPORTANT INSTALLATION INSTRUCTIONS

WARNING

TO REDUCE THE RISK OF SEVERE INJURY OR DEATH

READ AND FOLLOW ALL SAFETY, INSTALLATION AND OPERATION INSTRUCTIONS. If you have any questions or do not understand an instruction, call The Genie Company.

• DO NOT install opener on an improperly balanced door. An improperly balanced door could cause severe injury. Repairs and adjustments to cables, spring assembly and other hardware must be made by a trained service person using proper tools and instructions.

• Remove all ropes, and disable all locks connected to the door before installing opener.

• Where possible, install the door opener 7 feet or more above the floor. For products having an emergency release, mount the emergency release within reach, but at least 6 feet above the floor and avoiding contact with vehicles to avoid accidental release. DO NOT use emergency release cord to pull door.

• DO NOT connect the opener to the source of power until instructed to do so.

• Locate the wall control button: A) Within sight of door. B) At a minimum height of 5 feet, so small children cannot reach it. C) Away from all moving parts of the door.

• Install the entrapment WARNING label next to the wall button or console, in a prominent location. Install the emergency release handle on the emergency release cord.

• The opener must reverse when the door contacts a 1-1/2 inch high object on the floor at the center of the doorway. This is about the size of a 2” x 4” board laid flat.

IMPORTANTES INSTRUCTIONS D’INSTALLATION

AVERTISSEMENT

POUR RÉDUIRE LES RISQUES DE BLESSURES GRAVES VOIRE MORTELLES

LIRE ET SUIVRE ATTENTIVEMENT TOUTES LES INSTRUCTIONS D’INSTALLATION ET DE FONCTIONNEMENT AINSI QUE TOUTES LES CONSIGNES DE SÉCURITÉ. Si vous avez des questions ou si vous ne comprenez pas une instruction, veuillez contacter directement The Genie Company.

• NE PAS installer l’opérateur sur une porte mal équilibrée. Celle-ci pourrait entraîner de graves blessures. Les réparations et les réglages des câbles, ensembles de ressort ou tout autre article de quincaillerie doivent être effectués par un professionnel qui se sert d’outils appropriés et qui respecte les instructions.

• Enlever toutes les cordes et désactiver toutes les verrous de la porte avant l’installer l’opérateur.

• Dans la mesure du possible, installer l’ouvre-porte à 2,1 m ou plus au-dessus du sol. Pour les produits dotés d’un cordon de déclenchement d’urgence, installer le déclenchement d’urgence mais au moins à 1,8 m au-dessus du sol en évitant tout contact avec les véhicules pour éviter qu’ils ne soient déclenchés accidentellement. NE PAS utiliser d’urgence cordon de libération pour ouvrir ou fermer la porte.

• NE PAS connecter l’opérateur à la source d’alimentation tant que l’instruction n’est pas donnée.

• Repérer la console murale: A) En vue de la porte. B) À une hauteur minimale de 1,5 m afin que les jeunes enfants ne puissent pas l’atteindre. C) Loin de toutes pièces mobiles de la porte du garage.

• Placer l’étiquette d’AVERTISSEMENT en cas de coinçage à proximité du bouton mural ou de la console de manière à ce qu’elle soit bien en évidence. Installer la poignée du cordon de déclenchement d’urgence.

• L’opérateur doit s’inverser lorsque la porte entre en contact avec un objet d’une hauteur de 3,8 cm placé sur le sol, au centre de l’ouverture de la porte. Ceci équivaut environ à une planche de 5 x 10 cm posée àplat sur le sol.

WARNING

Opener is equipped with grounded electrical plug for your protection, and only fits grounded outlets. DO NOT alter plug in any way! If you have no grounded outlets, have one installed by a licensed electrician. Opener must be properly grounded to prevent personal injury and equipment damage. NEVER USE AN EXTENSION CORD! Check local building codes for any requirement that you must have a permanent hard-wired connection. Permanent hard-wired connections must be performed by a licensed electrician using proper tools and instructions.

AVERTISSEMENT

L’opérateur, qui est équipé d’une prise électrique mise à la terre pour votre protection est compatible uniquement avec des prises électriques mises à la terre. NE PAS modifier la fiche d’une quelconque manière. Si vous n’avez pas de prises mises à la terre, faites-en installer par un électricien agréé. L’opérateur doit être correctement mis à la terre pour éviter les blessures corporelles et des dommages matériels. NE JAMAIS UTILISER DE RALLONGE! Vérifiez les codes locaux des bâtiments pour connexions câblées permanente. Les connexions câblées permanentes doivent être effectuées par un électricien agréé qui se servira d’outils appropriés et respectera les consignes.
SAFETY & STANDARD FEATURES

Safe-T-Beam® (STB) Non-Contact Reversing System:
Puts an invisible beam across the door opening. The door stops and reverses to the full open position if anything passes through the beam. LED indicator lights on the powerhead and on the STBs provide self-diagnostics if an operational problem exists.

Safe-T-Beam® (STB) FUNCTION:
1. The Safe-T-Beam® has no effect on the door during an opening cycle.
2. If the Safe-T-Beam® detects an obstruction when trying to close the door, it will not allow the door to close.
3. When the garage door is closing, if Safe-T-Beam® is interrupted by a person or obstacle, the garage door will stop its downward travel and reverse automatically to its fully opened position.
4. If the Safe-T-Beam® System fails, loses power, or is installed improperly, press and hold the wall console “open/close” button until the door reaches its fully closed position. If you release the “open/close” button on the wall console during the closing movement, the door will reverse automatically to its fully-opened position.

Door Detect™ Monitoring System:
Monitors the Safe-T-Beam® system to ensure proper functionality and will automatically stop and reverse a closing door if a problem is detected.

Safe-T-Reverse® Contact Reversing System:
Automatically stops and reverses a closing door within two seconds of contact with an object.

Manual Emergency Release:
Manually releases door from door opener. Used during a power failure or other emergency to allow manual opening and closing of door. DO NOT use emergency release cord to pull door!

SmartSet® Electronic Programming:
Easily adjust the programming to set limits and program new remotes.

Automatic Lighting System:
Dual Bulb lighting system supplies light for safer evening exits and entries. Turns ON when door is activated and automatically turns OFF 4 minutes later.

Intellicode® Encryption:
An encryption system that enhances the security of the door opener by continuously changing the access code each time the remote is used. The door opener responds to each new code only once. An access code copied from a working system and tried again, will not control the door opener.

Vehicle Compatible:
Home Link® and Car2U® compatible. See instructions in this manual, refer to the motor vehicle manual or visit www.geniecompany.com for instructions.

Factory Programmed Remote Control:
For ease and speed of installation, the remote included with this opener comes from the factory already programmed. No additional steps are required to activate the door using the remote.

Series II Wall Console:
Operates door opener from inside garage. The wall console has an indicator light with:

1. Indicator Light: Large white button will display Red when wall console is properly wired and Sure-Lock™ is OFF. When Sure-Lock™ is ON, this light is off.
2. Open/Close Button: Use this button to open or close garage door. When Sure-Lock™ is ON the Open/Close button will CLOSE the door only.

NOTE: Constant button pressure in the CLOSE mode will override STB fault in the powerhead and close door.

3. Independent Light Control Button: Use this button to turn the powerhead lights ON. Powerhead lighting will remain ON until this button is pressed again or a door action has been completed.
4. Sure-Lock™ Button: When Sure-Lock™ is ON, and the door is closed, the powerhead cannot be activated by the wall console or a remote.
   • Slide switch up to activate Sure-Lock™ (red light goes off).
   • Slide switch down to turn Sure-Lock™ OFF (red light goes on).

Genie Battery Backup (BBU):
Included with 3020H-B, and available as an option on 3020H. Provides power to opener in the event of a power failure.

NOTE: Genie Battery Backup will only operate after opener installation is completed and Travel Limits have been set.
NOTE: Before programming the opener, check to make sure there are no objects in the garage door opening.

INTRODUCTION
Now that the Genie® garage door opener is installed, follow the steps in this manual to program the opener so that the door opens and closes properly and all remote devices operate correctly. The following steps are a guide to setting opener so it functions properly.

The following steps list the order of programming the opener’s functional settings for use.
1. “TRAVEL LIMITS”
2. “FORCE CONTROL”
3. “REMOTE PROGRAMMING”

OVERVIEW OF POWERHEAD CONTROLS
This section describes the programming functions of the opener. Use the following information to understand the buttons and LED indicators used to program functions.

Powerhead: There are 3 programming buttons and 2 LED lights on the powerhead. Each of the buttons are used to enter and complete the setup programming. The LED lights indicate status or a function change by illuminating ON, OFF, or ON FLASHING.

There are 3 programs:
1. Door Travel Limits.
   This program is used to set how far the door travels up and down.
2. Force Setting Program.
   This program controls the force applied during the closing and opening of the door. They are factory set and will rarely require adjustment.
3. Remote Programs (default menu)—only required for added remote control transmitters.
   Describes how to program remotes to sync with additional remote control devices, wall consoles, keypads and the powerhead.

NOTE: The 3 programming buttons are for programming ONLY. These buttons can NOT be used to operate the opener once the Required Programming section has been successfully completed.

NOTE: Each programming step has a 30 second time limit for completion after the function is initiated. After 30 seconds, two LED’s will illuminate RED indicating time has expired and the step must be re-started. Restart the step as many times as necessary to complete the programming.

• Just remember—the pointed end of the button (like an arrowhead) points in the direction the carriage will move when that button is pushed.
**WARNING**

- Make sure doorway is in full view and clear of obstacles and people to avoid injury or property damage.
- DO NOT operate this unit from the wall control before LIMITS are set. Severe damage to the opener could occur.
- The carriage MUST be engaged to turnbuckle BEFORE setting limits. See installation poster or call Customer Service at 1-800-35-GENIE or visit www.GenieCompany.com.
- DO NOT set limits with Battery Backup attached. AC power MUST be connected to the opener while setting limits for proper operation.

---

**AVERTISSEMENT**

- S’assurer que le passage de la porte est visible et dégagé, à savoir sans obstacles ni personne afin d’éviter toute blessure potentielle ou dommage matériel.
- NE PAS utiliser cette unité avec la console murale avant d’avoir réglé les LIMITES. L’ouvre-porte pourrait subir de sérieux dommages.
- La tendeur DOIT être engagée dans le chariot AVANT de régler les limites. Voir le poster d’installation (si fourni) ou appelez le service clientèle au 1-800-35-GENIE ou visitez le site www.GenieCompany.com.
- NE PAS fixer de limites en mode batterie de secours. L’alimentation CA DOIT être branchée sur l’ouvre-porte, pendant le réglage des limites, pour assurer un bon fonctionnement.

---

**NOTE:** Carriage should be locked to opener. Door should rest somewhere between full open and closed. Do not start with door fully open or closed.

**Programming DOWN Limit:**

1. Press and hold the DOWN arrow button.
   - Long LED will light BLUE.
2. Release DOWN arrow button.
   - Long LED will flash BLUE.

3. Press and hold the DOWN arrow button until door is fully closed.
   - Use the UP arrow button if door closes too far. Use both UP and DOWN buttons to adjust close travel as necessary.

*Door should rest on the floor until the weather strip is compressed enough to seal along the width of the door. Damaged doors or uneven floors may not seal properly. Repair these conditions to achieve a proper seal. DO NOT compress seal so much that the door will bend or buckle.*

4. Press and release the SET/PRGM button
   - Both LEDs will flash BLUE then go out.

The DOWN limit is now programmed.
**Programming UP Limit:**

1. Press and hold the UP arrow button.
   - Long LED will light BLUE.
2. Release UP arrow button.
   - Round LED will flash BLUE.

3. Press and hold the UP arrow button until door is fully open.
   - Use the DOWN arrow button if door opens too far. Use both UP and DOWN buttons to adjust open travel as necessary.

   *Door should fully open so that door seal is even with door header. Do Not adjust so much that the door will bend or buckle or stretch door spring cables backward.*

4. Press and release the SET/PRGM button
   - Both LEDs will flash BLUE then go out.

   The UP limit is now programmed.

---

**1-2. Enter Programming Mode**

- **HOLD**
- **UNTIL**
- **LED**
- **Lights**

---

**3. Adjust Door Position**

---

**4. Lock Programming**
Force Control

The force controls are automatically set when the wall control is used for the first time with garage door opener. The door MUST complete one full cycle, from full open to full close and then, full close to full open, before the settings are automatically recorded.

**WARNING**

**TO AVOID INJURY OR DAMAGE**
- NEVER adjust the force settings to adjust for damage, including an unbalanced door, binding door track or broken spring.
- Perform a CONTACT REVERSE TEST monthly.

**AVERTISSEMENT**

**Pour éviter les blessures ou des dommages**
- **NE JAMAIS** régler la force pour compenser des dommages, y compris une porte mal équilibrée, un rail de porte coinçant ou des ressorts cassés.
- Tous les mois, EFFECTUEZ LE TEST D’INVERSION AU CONTACT.

1. Press and release the Wall Control button and allow the garage door to travel and stop at the DOWN limit.

2. Press and release the wall control button and allow the garage door to travel and stop at the UP limit.

**Force Control Adjustments**

*Force settings are programmed from the factory to remain within safe parameters. These should not require adjustments. However, certain circumstances may require adjustment. See section 4 Maintenance and Adjustments for detailed instructions pertaining to the adjustment of force controls.*

Contact Reverse Test

**NOTE:** The limit and Force settings MUST BE COMPLETED before performing the Contact Reverse Test.

1. With the garage door open, lay a 2 X 4 board flat on the floor at the center of the door opening.
2. Close the garage door using the wall control.

**Contact Reverse Adjustment**

If the door stops before contacting the board or if it does not reverse direction to fully open after contact with the board, it may be due to an improperly set DOWN limit. Verify settings by:
1. Repeat the “Down Travel Limit” section to make certain the door is closing tight against the floor.
2. Repeat the “Force Control” section on the left to set force limits.
3. Repeat the “Contact Reverse Test” above.
Repeat this process as needed until the door passes the Contact Reverse Test. For further help, refer to the “Maintenance and Adjustment” section/Regular Maintenance.
THE REMOTE CONTROLS INCLUDED WITH THIS OPENER HAVE BEEN PROGRAMMED AT THE FACTORY FOR YOUR CONVENIENCE.

NOTE: The following instructions are for remote control transmitters purchased separately in addition to those provided with this opener, but can also be used if any remote(s) may require re-programming.

NOTE: Each programming step has a 30 second time limit for completion after the function is initiated. After 30 seconds, two LED’s will illuminate RED indicating time has expired and the step must be re-started. Restart the step as many times as necessary to complete the programming.

NOTE: Do not hold remote too close to the powerhead when programming remote buttons.

NOTE: Each button on each remote must be programmed separately, following these steps.

1. Remove the battery’s protective film from the remote by pulling straight down.

2. Press and hold the SET/PRGM button on the opener for two seconds.
   - The ROUND LED will turn BLUE.
   - The LONG LED will then flash PURPLE.

3. Stand at least 5 feet away from opener and slowly press and release the desired button on the remote two times.
   - Both opener LEDs will flash and turn off indicating the remote has been programmed.

4. Press the desired remote button again.
   - The opener should run.

To program the same remote for other garage door openers, repeat the steps above using one of the other remaining remote buttons.

REPEAT STEPS 1 TO 4 FOR EACH OPENER AND REMOTE

NOTE: It is possible to press the remote button too quickly or lightly. If the LEDs do not go off, press the remote button several more times to achieve confirmation.

BASIC PROGRAMMING IS COMPLETE AND YOUR GARAGE DOOR OPENER IS READY TO USE.

See back of this manual to erase remote devices from memory.
To reduce the risk of severe injury or death, read and follow all instructions.

1. NEVER let children operate or play with the door controls.
2. Keep remote away from children.
3. ALWAYS keep the moving door in sight and away from people and objects until door is completely closed. NO ONE SHOULD CROSS THE PATH OF THE MOVING DOOR.
4. NEVER GO UNDER A STOPPED, PARTIALLY OPEN DOOR.
5. Test opener monthly. The door MUST reverse on contact with a 1-1/2” high object (or 2” x 4” board laid flat) at the center of the doorway on the floor. After adjusting either the force or limit of travel, retest door opener. Failure to adjust the opener properly may cause severe injury or death.
6. When possible, use emergency release only when door is closed. Use caution when using this release with the door open. Weak or broken springs are capable of increasing the rate of door closing and increasing the risk of severe injury or death.
7. KEEP DOORS PROPERLY BALANCED. See your garage door Owner’s Manual. An improperly balanced door increases the risk of severe injury or death. Have a trained door system technician make repairs to cables, spring assemblies, and other hardware.

Opener is equipped with grounded electrical plug for your protection, and only fits grounded electrical outlets. DO NOT alter plug in any way! If your have no grounded outlets, have one installed by a licensed electrician. Opener must be properly grounded to prevent personal injury and equipment damage. NEVER USE AN EXTENSION CORD! Check local building codes for any requirement that you must have a permanent hard-wired connection. Permanent hard-wired connections must be performed by a licensed electrician using proper tools and instructions.

La quincaillerie de la porte de garage (ressorts, câbles, supports, poulies, etc.) sont sous des pressions et des tensions extrêmes. NE PAS réparer ni régler les ressorts de la porte ou toute autre pièce de quincaillerie. NE PAS ACTIONNER la porte manuellement ou automatiquement si elle n’est pas correctement équilibrée ou si des ressorts sont cassés.

CONTACTEZ UN TECHNICIEN SPÉCIALISÉ EN SYSTÈME DE PORTES
4 MAINTENANCE & ADJUSTMENTS

WARNING
Use of any other wall control can cause unexpected operation of the door and loss of lighting feature. Locate wall console within sight of the door but far enough from door to prevent contacting it while operating the console. Control must be at least 5 feet above the floor to prevent small children from operating it.

AVERTISSEMENT
L'utilisation d'une autre commande murale pourrait produire des résultats inattendus de la porte ainsi que le dysfonctionnement de l'éclairage. Localisez la console murale en vue de la porte et suffisamment loin de la porte pour éviter tout contact pendant l'utilisation de la console. La commande doit être à une hauteur minimale de 1,5 m au-dessus du sol afin que les jeunes enfants ne puissent pas l'atteindre.

Regular Maintenance
Basic monthly maintenance tasks include:
• Contact Reverse Test
• Lubricate door hardware
• Safe-T-Beam® System check
• Door balance
• Remote Battery Replacement (As needed)
• Light Bulb Replacement (As needed)

A. Contact Reverse Test
See page 10.

B. Lubricate Door Hardware
Inspect door rollers and hinges and lubricate as needed using a light weight general purpose grease.

C. Safe-T-Beam® (STB) System Check
Check that both the RED and GREEN LEDs are ON steady. This indicates the system is working properly. If both LEDs are not ON steady, check the appropriate items below:
• STB red LED flashes.
  – Check for obstruction.
  – Check alignment. (See page 16)
  – Verify wire routing from STBs to STB connection in powerhead
  – Check for signal interference from another Safe-T-Beam® unit (for multiple door installations).
• No STB red or green LED displayed.
  – Check wiring and wire connections
If system appears to be working properly, perform check as follows:
1. Start the door closing.
2. Pass an object through the beam. The door should stop and reverse to the fully open position.

D. Door Balance (Spring Tension)
Perform the check as follows:
• With the door closed, pull manual emergency release handle DOWN and away from door and let go to disengage the carriage from the drive chain or belt (see illustration).

E. Remote Battery Replacement (As needed)
Remote Battery Replacement (1-button)
Replace remote battery with a CR2032 coin cell battery.
1. Slide the battery cover off (it's the lower half of the remotes case) by pressing on the case just below the indentation at the top of the cover and sliding it down. Alternately, insert a coin or small washer into the indentation in the front of the case and pry to unlatch the battery cover in order to slide it off.
2. Slide out the old battery and slide in the new.
3. Slide the battery cover on until it snaps into place.

Remote Battery Replacement (3-button)
Replace remote battery with a CR2032 coin cell battery.
1. Open remote case using a washer or coin that fits into the slot on the top of the remote.
2. Replace battery. Be sure positive side (+) is UP.
3. Align components and snap case closed.

Disengage the carriage by pulling the release handle down, toward the door and then releasing

DO NOT use release cord to pull door.

Remote Battery Replacement (1-button)
Replace remote battery with a CR2032 coin cell battery.
1. Slide the battery cover off (it's the lower half of the remotes case) by pressing on the case just below the indentation at the top of the cover and sliding it down. Alternately, insert a coin or small washer into the indentation in the front of the case and pry to unlatch the battery cover in order to slide it off.
2. Slide out the old battery and slide in the new. Be sure positive side (+) is UP.
3. Slide the battery cover on until it snaps into place.

Remote Battery Replacement (3-button)
Replace remote battery with a CR2032 coin cell battery.
1. Open remote case using a washer or coin that fits into the slot on the top of the remote.
2. Replace battery. Be sure positive side (+) is UP.
3. Align components and snap case closed.
F. Light Bulb Replacement

<table>
<thead>
<tr>
<th>® WARNING</th>
<th>® AVERTISSEMENT</th>
</tr>
</thead>
</table>
| • Use extreme caution when working from a ladder or step stool or serious injury can occur.  
• When replacing light cover, make sure wires are not pinched or near moving parts.  
• Use only properly rated incandescent, LED or CFL light bulbs.  
• Use A19 size light bulbs. DO NOT use bulbs having a short neck.  
• Use 60 Watt MAX. incandescent bulbs or the CFL or LED equivalent.  
• Genie LED light bulbs, which are specifically made for garage door openers, are recommended.*  
• Close powerhead light cover(s).  |  
| • Faire particulièrement attention lors de travaux effectués depuis une échelle ou en escabeau.  
• En referment le couvercle de l’éclairage, s’assurer que les fils ne sont ni coincés ni près des pièces mobiles.  
• Utilisez uniquement incandescence correctement classé, LED ou des ampoules fluocompactes.  
• NE PAS utiliser des ampoules avec une note supérieure à 60 Watts  
• Utilisez A19 ampoules de taille. NE PAS utiliser des ampoules ayant un cou court.  |

Changing Light Bulbs

1. Disconnect power to door opener.  
   Open powerhead light cover(s) by pressing down on upper locking tabs.  
   • Replace old light bulb(s) with new.  
   • Use 60 Watt MAX. incandescent bulbs or the CFL or LED equivalent.  
   • Genie LED light bulbs, which are specifically made for garage door openers, are recommended.*  
   • Close powerhead light cover(s).  
2. Reconnect power to door opener.  
   • Test light operation.

**NOTE:** Use of standard LED bulbs may reduce the range of your remote controls.

* Genie LED light bulbs are designed to reduce or eliminate reduced remote range issues caused by common LED bulbs. They also offer better product life by making them resistant to vibration caused by the opener, and cold or damp weather. See website for details at www.GenieCompany.com. recommendations for LED bulbs.
G. Adjustment Guides

**WARNING**

**TO AVOID INJURY OR DAMAGE**
- **NEVER** adjust the force settings to adjust for damage, including an unbalanced door, binding door track or broken spring.
- Perform a CONTACT REVERSE TEST monthly. See page 10.

**AVERTISSEMENT**

**Pour éviter les blessures ou des dommages**
- **NE JAMAIS** régler la force pour compenser des dommages, y compris une porte mal équilibrée, un rail de porte coïncant ou des ressorts cassés.
- Tous les mois, EFFECTUEZ LE TEST D’INVERSION AU CONTACT. Voir page 10.

### Force Settings

Force settings are pre-programmed at the factory and applied during the Open/Closed Limit settings steps (see page 8). For normal use, these settings should not need adjustments with this unit.

Conditions possibly requiring adjustments are:
1. Doors with very stiff weather seals.
2. Doors that start down, STOP, and reverse before closing.
3. Doors that start up, but STOP before they completely open.

Press and hold both up and down arrow buttons until round LED turns RED, release button. BLUE LED will flash 3 times.

#### FORCE SETTINGS CHART

<table>
<thead>
<tr>
<th>Force Level</th>
<th>Powerhead LEDs</th>
</tr>
</thead>
<tbody>
<tr>
<td>Long LED</td>
<td>Round LED</td>
</tr>
<tr>
<td>Force Level 1</td>
<td>Off&lt;br&gt;BLUE</td>
</tr>
<tr>
<td>Force Level 3</td>
<td>BLEU&lt;br&gt;BLEU</td>
</tr>
<tr>
<td>Force Level 5</td>
<td>PURPLE&lt;br&gt;Off</td>
</tr>
<tr>
<td>Force Level 7</td>
<td>Off&lt;br&gt;RED</td>
</tr>
<tr>
<td>Force Level 9</td>
<td>RED&lt;br&gt;RED</td>
</tr>
</tbody>
</table>

LED indicator colors: ○ OFF ○ Blue ○ Purple ○ Red

LEDs will now display current UP force setting (See chart).

- Press either arrow button until desired UP force setting is reached (see chart).
- Once setting is chosen, press and release. This will lock the UP force setting.

LEDs will now show current DOWN force setting. (See Chart).

- Press either arrow button until desired DOWN force setting is reached. (See chart).
- Once setting is chosen, press and release. This will lock the DOWN force setting.

The LEDs will now turn BLUE then off. This confirms that both force setting have been reset and unit is ready for normal operation.

Repeat “Learn Force Limits and Contact Reverse Test” page 10

H. Resetting Travel Limits

See pages 8-9 to reset travel limits. Force setting and contact reverse test must be performed in the event of a travel limit change.
LOCATING SAFE-T-BEAM® PAIRS
Transmitter (RED LED) and Receiver (GREEN LED)

Single Garage Door
• Determine which side of the garage receives direct sunlight.
• Position the Transmitter (RED LED) on the direct sunlight side.

Multiple Garage Doors
• NEVER position Safe-T-Beam® modules where signals will cross.
• Place the Transmitter (RED LED) Safe-T-Beams on adjacent doors facing in opposite directions.

NOTE: Direct sunlight creates interference with Safe-T-Beam® Receiver (Green LED). STB modules CAN be positioned further away from the door opening if necessary to avoid sunlight but no further off the wall to maintain alignment with the Transmitter (Red LED) module.

NOTE: Only use Safe-T-Beams® that are included with this opener. DO NOT use other brands or types of photocells on this opener.

WIRE DIAGRAM

WARNING
ELECTRICAL SHOCK
OPENING COVER MAY CAUSE ELECTRICAL SHOCK
Disconnect power from opener prior to removing cover

AVERTISSEMENT
CHOC ÉLECTRIQUE
OUVERTURE DE COUVERTURE PEUT PROVOQUER CHOC ÉLECTRIQUE
Coupez l'alimentation du premier match avant de retirer le couvercle.

MAINTENANCE & ADJUSTMENTS
## TROUBLESHOOTING

**PROBLEM:**  
**WHAT TO DO:**

| Opener does NOT operate when wall control is pressed. | • Turn Sure-Lock™ OFF See page 6.  
• Check power source.  
  – Plug a lamp into outlet used for powerhead. If lamp works, power source is OK.  
  – If not, check fuse or circuit breaker.  
• If power is OK,  
  – Check connections at powerhead terminals and at wall console.  
• Check for reversed, broken or cut wires. Staples can cut insulation and short wires. Repair or replace. |
|---|---|
| Opener runs, but door does not move. | • Make sure carriage is engaged with chain/belt turnbuckle. Refer to installation poster or download poster from www.GenieCompany.com  
• Check to make sure chain/belt is not broken or off its pulley. |
| Opener works from wall control, but NOT from remote. | • Check all remotes.  
• Replace remote battery. See page 13.  
• Program remotes to powerhead. See page 11. |
| Remote has less than 25 feet operating range or no operation. | • Relocate remote inside car and/or point remote at garage door.  
• Replace battery. See page 13.  
• Reposition door opener antenna.  
• Eliminate possible competing signals (radio, etc.).  
• LED bulbs may be interfering with remote signal. See page 14. |
| Door starts down, then STOPS and goes back up. OR Safe-T-Beam® System malfunction. | • If NEW installation, check Door Arm position. Refer to installation poster or download poster from GenicCompany.com.  
• If NEW Installation, make sure ONLY the Safe-T-Beams® that came with this opener are installed.  
• Check if limits are properly set. See pages 8-9. Adjust limits as needed.  
• Check if Safe-T-Beam® red LED is flashing. See page 15. Safe-T-Beam® system check.  
• Check Safe-T-Beam® system for beam obstruction or misalignment of lenses. See page 15, Safe-T-Beam® system.  
• Check garage door for binding.  
• If an operational problem exists, and opener will not close, the opener can be forced to close as follows: Press and hold the wall control button until door is completely closed.  
• Check for interference from adjacent Safe-T-Beam® units. See page 15.  
• Contact Genie at 1-800-35-GENIE. |
| Door starts down, then STOPS before it is closed. OR Door will only open. | • If you suspect a problem with the garage door hardware or springs, visit www.GenieCompany.com and use the “dealer locator” to hire a local door service professional.  
• Check Safe-T-Beam® wire connection at powerhead and at STBs. See page 16, Safe-T-Beam® system check.  
• Check if limits are properly set. See pages 8-9. Adjust limits as needed.  
• Check CONTACT REVERSE. See page 10.  
• Check garage door for binding. See maintenance and adjustment. Page 13.  
• Check closing “FORCE” control. See page 10, or Force settings. Page 15. |
| Door starts up, but STOPS before it is completely open. | • Check if limits are properly set. See pages 8-9. Adjust limits as needed.  
• Be sure door, opener, springs are in good repair, properly lubricated and balanced.  
• Check opening “FORCE” control. See page 10, or Force settings Page 15.  
• If you suspect a problem with the garage door hardware or springs, visit www.GenieCompany.com and use the “dealer locator” to hire a local door service professional.  
**NEVER** try to repair door hardware or springs yourself. |
| Door will only run closed. | • Turn Sure-Lock™ OFF See page 6.  
• Check if limits are properly set. See pages 8-9.  
• Check door balance, condition, and door spring.  
• Check opening “FORCE” control. See page 10, or Force settings. Page 15.  
• If you suspect a problem with the garage door hardware or springs, visit www.GenieCompany.com and use the “dealer locator” to hire a local door service professional.  
**NEVER** try to repair door hardware or springs yourself. |
| Door opener starts for no reason. | • Button stuck on wall control or remote.  
• Was remote lost or stolen? Erase all remotes from powerhead memory and program new remotes. See page 20. |
| Noisy operation. | • Be sure all door fasteners are tight.  
• Be sure garage door is in good repair, properly lubricated and balanced.  
• Be sure opener is in good repair. |
| Door opener runs slow. | • Check operating condition of door. Door may need professional repair/adjustment.  
• Is this opener installed on a one-piece door? This opener is not designed to operate a one-piece door. |

Installing Genie Battery Backup

For units that included with optional battery backup (BBU)

1. Unplug powerhead from power source.
2. Tilt BBU approximately 45° and lower into slots in the top rear of the powerhead.
3. Fasten to powerhead with 2 supplied self tapping screws.

NOTE: There are no holes in rear cover. Self Tapping screws will self tap through cover.
4. Plug battery harness into plug located at the top of the powerhead.
5. Reconnect powerhead to power source.

Testing The Genie Battery Backup

NOTE: It is recommended that the battery backup be allowed to charge for 24 to 48 hours prior to testing. Initially, the opener may not operate from the battery backup mode if battery is not fully charged.

1. Run the opener using the wall control or remote to ensure it is working properly.
2. Turn off power to opener by unplugging from outlet or turning off breaker.
3. Press wall control or remote control. Opener will run at a slower speed than normal.

NOTE: See troubleshooting guide (pg. 18) in this manual if any of the steps above fail.

Work light will not operate while in battery backup mode. (Courtesy white LED’s will illuminate.)
4. After successful test, reconnect powerhead to power source.

Replacing The Battery in the Genie Battery Backup

Proper care should be used when handling a battery. Eye protection should be worn.

NOTE: DO NOT reverse polarity (+) and (-) as this will damage the powerhead.

1. Unplug powerhead from power source.
2. Unplug battery backup from harness connection.
3. Remove both mounting screws from rear of battery backup.
4. Detach battery backup from back of opener by tilting the BBU approximately 45 degrees and lifting up towards the ceiling.
5. Remove 4 screws from battery hold down bracket.
6. Remove battery.
7. Disconnect harness wires from the (+) and (-) terminals.
8. Replace in reverse order

NOTE: Allow 24-48 hours to charge battery before testing.
9. Test as noted above.
CLEARING MEMORY OF REMOTES

**NOTE:** Clearing memory of remotes from the powerhead will clear ALL programmed remotes, wireless keypads and vehicle transmitters. The opener will no longer recognize any signal from any remote device, including a missing remote device.

All remaining (or recovered) remotes, vehicles and wireless keypads MUST be reprogrammed.

**NOTE:** The garage door opener will operate normally using the wall console.

1. Press and hold the SET/PRGM button on the opener for two seconds.
   - The ROUND LED will turn BLUE.
   - The ROUND LED will then flash PURPLE.

2. Press and hold the UP & DOWN buttons at the same time until both LEDs turn off.
   - Both opener LEDs will flash and turn off indicating that all remotes have been erased.

3. Press any remote button.
   - The opener should NOT run.

To deprogram the same remote for other garage door openers, repeat the steps above using one of the other remaining remote buttons.

1. **Enter Programming Mode**
   - Solid Blue
   - PRESS & RELEASE

2. **Press and Hold + & - Buttons**
   - Flashing Blue

3. **Test Remote**
   - OFF
**Programming HomeLink® System**

**Step 1 Clear HomeLink**

Clear HomeLink by pressing and holding down the first and third buttons until the indicator on the HomeLink blinks slow and then fast for 20 seconds; then release both buttons.

*NOTE*: Clearing the HomeLink will remove all previously programmed garage door openers.

**Step 2 Train HomeLink to the Genie Remote**

Choose the button on the HomeLink that will be used to open the door.

*NOTE*: Hold the Genie Remote two inches from the HomeLink button.

Hold down the Genie remote button. While holding, press and hold the chosen HomeLink button. Hold down both buttons until the indicator on the HomeLink blinks slow then fast. Once it blinks, release both buttons.

**Step 3 Program HomeLink to the Genie Opener**

A. Press and hold the PROGRAM button on the opener until the round blue LED is ON. Release the button. The long purple LED will begin flashing.

B. Press the designated Genie HomeLink button for two seconds and release. Press that same button again for two seconds and release. The long LED will flash blue and then turn off.

C. Press the HomeLink button a few times more until door moves.

*NOTE*: For additional instructions, see the motor vehicle manual, [www.homelink.com](http://www.homelink.com) or visit [www.GenieCompany.com](http://www.GenieCompany.com)

**Programming Car2U® System**

**Step 1 Clear Car2U to default settings**

The default setting for the Car2U system is:
- Button 1 = Genie® Manufactured Openers
- Button 2 = LiftMaster® Manufactured Openers
- Button 3 = Wayne Dalton® Manufactured Openers

A. Press and hold buttons 1 and 3 for 20 seconds or until all three LEDs begin to flash.

B. Release both buttons. The Car2U system is now set to the Factory Default settings.

*NOTE*: Clearing the Car2U remote will remove all previously programmed garage door openers.

**Step 2 Program Car2U to the Genie Opener**

A. Press and hold the PROGRAM button on the opener until the round blue LED is ON—release the button. The long purple LED will begin flashing.

B. Press the designated Genie Car2U button for two seconds and release. Press that same button again for two seconds and release. The long LED will flash blue and then turn off.

C. Press the Car2U button a few times more until door moves.

**Step 3 Changing Factory Default Button for a Genie Opener**

A. Press and hold buttons 1 & 3 for ONE SECOND and release—all three LEDs will light solid red.

B. Press and hold the button (2 or 3) to change it to Genie—the corresponding LED will flash. While continuing to hold that button, press and release button 1. Press and release button 1 again.

C. Release the button being held in step B and wait for the LED to stop flashing. This button is now set for Genie. Repeat Step 2 for second Genie Opener.

*NOTE*: For additional instructions see the motor vehicle manual, [learcar2u.com](http://learcar2u.com) or visit [www.GenieCompany.com](http://www.GenieCompany.com)
Setting the PIN for the First Time:

1. Press in order the numbers
2. Press the PROGRAM key
3. Type a new PIN (3-8 digits)
4. Press the PROGRAM key again

The keypad is ready to program to an opener.
For use on a Single Door, continue to Synchronizing Keypad to Door.

NOTE: If the keypad lights do not flash and go OFF after setting PIN, clear the keypad and repeat Step 1; see next page for Resetting a PIN.

Locate the Opener’s Programming Buttons and LED:

Synchronizing Keypad to Door:

1. Press PROGRAM SET button two seconds until the round LED turns blue, then release. The long purple LED will blink.

2. Key in the new PIN on the keypad.
3. Press Up/Down key and opener LEDs will stay on steady.
4. Press Up/Down key again and opener LEDs turn off.
5. Press Up/Down key a third time and opener runs.

The process of programming ONE keypad to ONE opener is complete.

Multiple Door Section:

1. Key in the new PIN on the keypad. (3-8 digits).
2. Press the PROGRAM key two times.
3. Enter how many total doors the keypad will control (press 2 or 3 accordingly).
4. Press the PROGRAM key.
   The keypad is now programmed to receive multiple opener signals.
5. Locate the opener’s programming buttons and LED.
   Press PROGRAM SET button two seconds until the round LED turns blue; then release. The long purple LED will flash.
6. Type the new PIN (3-8 digits).
7. Press the Up/Down key one time.
8. Assign a number to the door that the keypad will operate by pressing 1-2 or 3.
9. Press that door number a second time.
10. Press that same door number a third time and the door will operate.

Wait 30 seconds for the keypad to go dark and then start with step 5 for the additional door/keypad combination as needed.

To add another opener to a keypad that is already programmed to an opener, follow all the steps in the ‘Multiple Door Section’.

Please note at Step 8, that the keypad assumes the original opener programmed to the keypad is opener #1.

Keypads can accept up to three openers.
Door Operation with Wireless Keypad:
To open and close a single door with the Keyless Entry Pad, enter the PIN number and press Up/Down Key (enter).
For multiple doors enter the PIN number, press the UP/Down Key once and enter the door number (1, 2 or 3).

NOTE: The Keyless Entry Pad will stay active for 30 seconds and will stop or start the door with each touch of any button on the keypad.

Changing an Existing PIN:
1. Enter the current PIN
2. Press the Program key one time
3. Key in the new PIN (3-8 digits)
4. Press the Program key one time

NOTE: Unlike “Resetting PIN,” there is no need to reprogram your opener after changing the PIN.

Resetting a PIN:
Press and hold both the PROGRAM key and the Up/Down key for about five seconds.
The LED's will slowly blink and then go out. When the LED stops blinking, the old programming has been successfully erased.
To create a new PIN, start with “Setting the PIN for the First Time”

Mounting Keypad
The keypad MUST be mounted within sight of the garage door(s) at least five feet above the floor and clear of any moving door part.

1. Remove battery cover and batteries.
2. Drill 3/32" pilot hole for the top mounting screw (included).
3. Install a screw into the pilot hole, leaving a 1/8" gap between the screw head and wall.
4. Hook the slotted mount, on back of keypad, over the screw.
5. Mark and drill a pilot hole for the bottom screw (included) and secure keypad to wall (DO NOT overtighten).
6. Reinstall batteries and cover.

Garage Door Openers Are Not Toys

Do not stand or walk under a moving door! Do not let children or adults play “beat the door.” It is dangerous and can result in serious injury or death. Adults should set a good example. Know how to use the emergency release, in case someone is pinned by the door.

Garage Door System Safety-
An Automatic Decision

A garage door is the largest moving object in the home. They are often operated by electric door openers. Proper installation, operation and maintenance and testing of the garage door and automatic opener are necessary to provide safe, trouble-free operation. An improperly adjusted garage door or automatic opener can exert deadly force when the door closes. This could lead to serious injury or death from being hit by a closing garage door or from being trapped under the door.

Safety if Everyone’s Business

A few simple precautions can protect our family and friends from potential harm. Please take a few minutes to read the following safety and maintenance tips. Refer to your garage door and opener owner’s manual for details specific to your garage door and automatic opener.

Some of the following precautions and warnings are identified with this “Safety and Alert Symbol.” This symbol indicates a potential personal safety hazard that can result in injury or death.

- Do not let children play with or use the transmitters or remote controls. Always place or store them out of the reach of children.
The pushbutton wall control should be out of the reach of children (at least 5 feet from the floor) and away from all moving parts. Mount and use the button where you can clearly see the moving garage door.

**Routine Maintenance Can Prevent Tragedies**

Take a few minutes to inspect and test your complete garage door system. Make monthly inspection and testing a part of your regular routine. Safety is everyone's business. Make garage door and garage door opener safety automatic in your home.

**Monthly Maintenance Checklist.**

- **Garage Door Opener**
  - Reversal Test
  - Force Setting Test
  - Additional safety devices

- **Garage Door**
  - Visual inspection-springs, rollers, pulleys, cables and track
  - Lubrication
  - Door balance test

Consult owner's manual for additional recommended maintenance for your models of door and manual.

**Testing and Maintaining The Garage Door Opener**

There are routine Safety and Maintenance steps that you should follow once a month. Review your owner’s manual for the door opener. If you don’t have the owner’s manual, look for the opener model number on the back of the power unit and request a manual from the manufacturer.

- **Reversal Test**

  Make sure your opener has a reversing feature. If a reversing feature is not present, it should be replaced. Garage door openers manufactured after January 1, 1993 are required by federal law to have advanced safety features which comply with the latest UL 325 Standards. Contact your manufacturer or installer for additional information.

**Teach Your Children About Garage Door and Opener Safety**

Garage door openers are not toys. Careless operation and allowing children to play with or use garage door opener controls can lead to tragic results. Discuss garage door safety with your children. Explain the danger of being trapped under the door.

When using the pushbutton or transmitter, keep the door in sight until it completely stops moving. Teach children never to play under or near an open garage door.

Teach children to keep their hands and fingers clear of section joints, hinges, track, springs and other door parts. Contact with a moving door or its hardware could cause serious injury. These injuries can also happen with garage doors that don’t have automatic openers.
Never remove, adjust or loosen the screws on the bottom brackets of the door. These brackets are connected to the spring by the lift cable and are under extreme tension.
Lubrication
Regularly lubricate the moving parts of the door. However, do not lubricate plastic parts such as plastic rollers and plastic idler bearing. Consult the door owner's manual for the manufacturer's recommendation.

Door Balance
Periodically test the balance of your door.
- Start with the door closed.
- If you have a garage door opener, use the release mechanism so you can operate the door by hand when doing this test.
- You should be able to lift the door smoothly and with little resistance. It should stay open around three or four feet above the floor. If it does not, it is out of adjustment. Have it adjusted by a qualified service person.

Garage Door Opener Safety–An Automatic Decision
This important information is provided by the U.S. Consumer Product Safety Commission, the National Safety Council and the Industry Coalition for Automatic Garage Door Opener Safety.
Genie Models 3020H, 3020H-B
Limited Warranty

GMI Holdings, Inc. d/b/a The Genie Company ("Seller") warrants to the original purchaser of the Models 3020H or 3020H-B garage door opener ("Product"), subject to all of the terms and conditions hereof, that the Product and all components thereof will be free from defects in materials and workmanship for the following period(s) of time, measured from the date of purchase:

MOTOR/GEARBOX –
Models 3020H & 3020H-B - FIFTEEN (15) YEARS

BELT - Fifteen (15) YEARS for Belt Drive Product
or
CHAIN - Five (5) YEARS for Chain Drive Product

ACCESSORIES - ONE (1) YEAR

CORE UNIT PARTS** -
Models 3020H & 3020H-B - THREE (3) YEARS.

OTHER PARTS - Parts and components not part of the Core Unit** - ONE (1) YEAR

**Limited Lifetime** shall mean for as long as the original purchaser owns the home in which the Product is originally installed

**The "Core Unit" consists of the power head, wired wall control, Safe-T-Beam® system, J-Arm and rail.

Seller’s obligation under this warranty is specifically limited to repairing or replacing, at its option, the Product or any part thereof which is determined by Seller to be defective during the applicable warranty period. Any labor charges are excluded and will be the responsibility of the purchaser.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. This warranty is made to the original purchaser of the Product only, and is not transferable or assignable. This warranty applies only to Product installed in a residential or other non-commercial application. It does not cover any Product installed in commercial or industrial building applications. This warranty does not apply to any unauthorized or improper installation, alteration or repair of the Product, or to any Product or component which has been damaged or deteriorated due to misuse, neglect, accident, failure to provide necessary maintenance, failure to follow owner's manual instructions, normal wear and tear, or acts of God or any other cause beyond the reasonable control of Seller, and does not cover batteries, use of extension cord, missing or damaged parts from clearance or open box sales, or repairs or maintenance to door components.

ALL EXPRESS AND IMPLIED WARRANTIES FOR THE PRODUCT, INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED IN TIME TO THE APPLICABLE WARRANTY PERIOD REFLECTED ABOVE. NO WARRANTIES, WHETHER EXPRESS OR IMPLIED, WILL APPLY AFTER THE LIMITED WARRANTY PERIOD HAS EXPIRED. Some states do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.

IN NO EVENT SHALL GMI HOLDINGS, INC. OR ITS PARENT OR AFFILIATES BE RESPONSIBLE FOR, OR LIABLE TO ANYONE FOR, SPECIAL, INDIRECT, COLLATERAL, PUNITIVE, INCIDENTAL OR CONSEQUENTIAL DAMAGES, even if Seller has been advised of the possibility of such damages. Such excluded damages include, but are not limited to, loss of use, cost of any substitute product, or other similar indirect financial loss. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

Claims under this warranty must be made promptly after discovery and within the applicable warranty period. To obtain warranty service, you must contact Genie® customer service toll free at 1-800-354-3643 to speak with a trained representative and attempt reasonable troubleshooting measures, as well as provide proof of the date and location of purchase, identification as the original purchaser and a description of the claimed defect. Purchaser must allow Seller a reasonable opportunity to inspect the Product claimed to be defective prior to removal or alteration of its condition. Upon determination by Seller that the Product or any part thereof is defective during the applicable warranty period (which may require purchaser to return the Product to Seller at purchaser’s expense), Seller will supply the purchaser with replacement parts or, at its option, a replacement Product (shipping and handling of any replacement Product or parts also at purchaser’s expense). Seller may use new or reconditioned parts, or a new or reconditioned Product of the same or similar design.

There are no established informal dispute resolution procedures of the type described in the Magnuson-Moss Warranty Act.
